Dear Reader:

As the Minister of Training, Colleges and Universities, I am pleased to release the 13th annual Employment Profile of graduates from Ontario's colleges of applied arts and technology.

The report provides a snapshot picture of the employment experiences of 2000–2001 college graduates six months after graduation. Information on graduate and employer satisfaction is also included.

The co-operation of graduates and their employers in responding to the Graduate Outcomes/Graduate Satisfaction and Employer Satisfaction surveys helped to develop this useful source of labour market information that serves two main purposes: to improve college programs and to provide useful information for potential college students who are making career choices and program selections. My sincere thanks to each Ontario college graduate and the employers involved in the survey for making that commitment to the Ontario Colleges of Applied Arts and Technology.

Yours sincerely,

Introduction

Background

The *Employment Profile* of Ontario college graduates summarizes the employment experiences of 2000–2001 graduates approximately six months after their graduation.

The Profile contains data gathered through the Key Performance Indicator (KPI) initiative, an innovative partnership between the ministry and the college sector. Graduates and their employers provide valuable feedback to colleges about their programs and services, and colleges are able to clearly demonstrate their achievements in responding to clients' needs. The satisfaction of graduates and employers with college programs is included in this report.

Scope

This report covers graduates of ministry-approved postsecondary certificate and diploma programs, who graduated in either August 2000, December 2000, or April 2001 from Ontario's colleges of applied arts and technology. A complete list of colleges can be found in the Ontario Colleges section detailing the Career Centres (page 9).

The employers' names were provided by graduates who consented to their employers being interviewed.

Graduates were interviewed about their college programs and their experiences since leaving the college. Employers were asked their opinions on the graduates' overall college preparation for the workplace jobs being performed by the graduates.

Methodology

The data published in this report are based on a census survey of graduates conducted six months after graduation. The survey of graduates' employers was conducted shortly after the completion of each graduate survey. An attempt was made to contact every graduate and employer. The overall response rate for graduates was 75 per cent, and 71 per cent for employers where consent to interview was given by the graduate.

The information was collected under the authority of the *Ministry of Training, Colleges and Universities Act*, and is used by the colleges for statistical purposes, and by the ministry to produce this annual employment profile of graduates.

Other Sources of Information

Information on postsecondary education programs and important factors that affect postsecondary choices can be found through different media and sources. User's Guide

Introduction

This User's Guide is intended to help readers understand the terms, information, and layout contained in the program cluster profiles. In the pages that follow, information is presented on graduates' employment experiences, both province-wide and for "program clusters" of related programs. The program cluster profiles provide information on graduate employment – full-time, part-time, earnings, graduate satisfaction, and employer satisfaction. Please note that percentages in this report may not add to 100 due to rounding.

Readers are advised to keep in mind that graduates' employment experiences change over time as they progress through their work careers. The information presented in this report reflects the status of graduates six months after they have graduated.

Changes to the Report

The Industries of Employment tables are based on the North American Industry Classification System (NAICS) which replaces Statistics Canada's Standard Industrial Classification Code (SIC). The classification systems are different and therefore this year's results cannot be compared with data prior to 2000.

Program Information Not Reported

To maintain adequate confidentiality in light of the Ontario Freedom of Information and Protection of Individual Privacy Act, employment information is not presented for programs in which the total number of graduates in the labour force is less than five. While data for these programs are included in the

overall cluster statistics, they are not included in the tables Summary of Graduate Outcomes by Program or Earning of Employed Participants.

Definition of Terms

To assist the reader, this section provides definitions of terms presented in the report.

Average Annual Earnings: Average starting annual salary of respondents who were employed in full-time jobs.

Employer Satisfaction: The percentage of employers that completed the survey who are satisfied with the employees' college preparation for the type of work being done.

Full-time Employment: At least 30 hours of work per week at one job, or less than 30 hours per week, if this is considered full-time employment in a particular occupational field.

Graduate Satisfaction: The percentage of graduates that completed the survey who are satisfied with the usefulness of their college education in achieving their goals after graduation.

Industries of Employment: Graduates' indication of the type of business or service offered by their employer coded on the basis of the North American Industry Classification System (NAICS).

Labour Force: Graduates who were either employed or looking for work during the reference week.

Median Salary: The middle annual earnings of graduates when the salaries are arranged in order of size.

Not in the Labour Force: Graduates who, during the reference week, were unemployed and not looking for work, including those attending school full-time, travelling, or staying home for health reasons or because of family responsibilities.

Occupational Categories: Graduates' occupations classified according to the 1993 Employment and Immigration Canada's National Occupational Classification Code (NOC).

Participation Rate: The labour force expressed as a percentage of the population in the survey.

Part-time Employment: Less than 30 hours of work per week.

Post Diploma programs: These programs are designed to provide additional or advanced skills that will enhance an existing knowledge base for which a certificate, diploma or degree has been awarded. They generally are one year in duration.

Program Cluster: A grouping of programs leading to related occupations.

Appendices

Appendix A: Graduate Outcomes, Graduate Satisfaction Survey

The Graduate Outcomes/Graduate Satisfaction Survey was conducted three times, six months after graduation from March 1, 2001 to April 25, 2001, July 2 to August 26, 2001, and November 1, 2001 to December 23, 2001 via telephone by Forum Canada Research Inc., a third party contracted by the Ministry of Training, Colleges and Universities. The reference weeks for the purpose of these surveys were March 1 – 7, 2001, July 2 – July 8, 2001 and November 1 – 7, 2001.

The students who graduated during 2000–2001 were contacted in order to get their comments about their college and their experiences since leaving the college. The graduates' comments are important to the college so it can improve its programs and services.

This information was collected under the authority of the Ministry of Training, Colleges and Universities Act and was only used by the college for statistical purposes and by the Ministry of Training, Colleges and Universities to produce its annual employment profile of graduates and to report on the performance of colleges. Graduates were provided with a contact if they indicated they wanted more information about the survey or any follow-up.

Appendix B: Employer Satisfaction Survey

The Employer Satisfaction Survey was conducted three times following each graduate survey: May 14 to June 8, 2001, September 17 to October 12, 2001, and January 14 – February 8, 2002 via telephone by Forum Canada Research Inc., a third party contracted by the Ministry of Training, Colleges and Universities. Students who graduated during 2000–2001 were contacted in order to get their comments about their college and their experiences since leaving the college. During this interview graduates were asked to give their permission to contact their employer. Where graduates identified themselves as self-employed, the graduate survey was extended to include the employer survey. Any reference to questions not in this survey is made to questions in the Graduate Outcomes, Graduate Satisfaction Survey.

The employer survey was conducted for the colleges with organizations that have hired their graduates in

the last year. The purpose of this survey was to find out how well the employer felt the college has prepared its graduates to meet their needs as an employer, not to evaluate the graduate. The employers' comments are important to the college so that improvement can be made to the college's programs.

This information was collected under the authority of the Ministry of Training, Colleges and Universities Act and was only used by the college for statistical purposes and by the Ministry of Training, Colleges and Universities to produce its annual employment profile of graduates and report on the performance of colleges. Employers were provided with a contact if they indicated they wanted more information about the survey or any follow-up.

The following questions reflect what employers were asked and are not the exact questions.
